Art Unit: 2879

Non-Statutory Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 17, 20, 22-25 and 27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 3 of U.S. Application Serial no. 09/800,669. Although the claims are not identical to claim 3, they are not patentably distinct because they are broader than claim 3 of the copending application.

2. Claim 26 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 50 of U.S. Application Serial no. 09/800,669. Although the claim is not identical to claim 50, it is not patentably distinct because it is broader than claim 50 of the copending application.

Prior Art Rejections

1) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2879

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 2) Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Hansler et al (US-4,389,201). Hansler et al, figure 20, teaches the step of cooling the bulb and gas fill while sealing the bulb so that the pressure of the bulb will be other than atmospheric pressure when the bulb is at room temperature.

Allowable Subject Matter

- 3) Claims 1-16 and 21 are allowed.
- 4) Claims 18, 19 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claim.

Reasons for indicating Allowable Subject Matter

- 5) The allowable subject matter was indicated since the prior art does not teach or suggest introducing a fill gas into a lamp envelope via a probe which is inserted into the bulb.

Citation of Pertinent Art

- 6) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Newell discloses the step of introducing a flush gas into a lamp bulb via a probe inserted into the bulb.
